

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**LISTING OF CLAIMS**

1. (Currently Amended) A method for providing feedback, said method comprising ~~the steps of:~~

a) forwarding a query pertaining to a structured entity having a plurality of parts;  
b) forwarding a plurality of response templates for answering the query; and  
c) receiving a first response from a first client device that addresses all of the plurality of parts of the structured entity, wherein said first response comprises a completed version of at least one of the plurality of completed response template templates, the completed version of the at least one of the plurality of response templates linking one or more of said plurality of parts of said structured entity, ~~the completed response template being selected from among the plurality of response templates by wherein~~ a user of the first client device decides which of the plurality of response templates to use in the first response and how many of the plurality of response templates to use in the first response.

2. (Currently Amended) The method of claim 1, further comprising ~~the step of:~~

d) receiving a second response from a second client device, wherein said second response comprises a completed version of at least one of the plurality of completed response template templates linking [[a]] one or more of said plurality of parts of said structured entity.

3. (Currently Amended) The method of claim 2, further comprising ~~the step of:~~

e) ~~aggregating said responses from said first and second client devices~~ first response and said second response to produce an aggregated result.

4. (Currently Amended) The method of claim 3, further comprising ~~the step of:~~  
f) forwarding said aggregated result to said first client device or said second client device.
5. (Currently Amended) The method of claim 2, further comprising ~~the step of:~~  
e) forwarding said first response of ~~said first client device~~ to said second client device.
6. (Original) The method of claim 1, wherein said structured entity comprises a sequential multi-step process.
7. (Original) The method of claim 1, wherein said structured entity comprises a literary work or a portion of a literary work.
8. (Original) The method of claim 7, wherein said literary work is a poem.
9. (Original) The method of claim 1, wherein said structured entity comprises a computer program.
10. (Original) The method of claim 1, wherein said structured entity comprises a musical composition.
11. (Original) The method of claim 1, wherein said structured entity comprises a biological organism.
12. (Original) The method of claim 1, wherein said structured entity comprises a computer data structure.
13. (Original) The method of claim 1, wherein said structured entity comprises an architectural structure.

14. (Original) The method of claim 1, wherein said structured entity comprises a chemical process.
15. (Currently Amended) The method of claim 1, wherein said first response contains an input entered by using said first client device.
16. (Currently Amended) The method of claim 15, wherein said input comprises filling in said at least one of the plurality of response ~~template~~ templates.
17. (Currently Amended) The method of claim 15, wherein said input comprises linking said at least one of the plurality of response ~~template~~ templates to at least one of said plurality of parts part of said structured entity.
18. - 19. (Cancelled)
20. (Currently Amended) The method of claim ~~[[1]]~~ 15, wherein said input comprises at least one tag.
21. (Currently Amended) A method for providing feedback, said method comprising the steps of:
- a) receiving a query pertaining to a structured entity having a plurality of parts;
  - b) receiving a plurality of response templates for answering the query; and
  - c) providing a first response that addresses all of the plurality of parts of the structured entity to an aggregating device from a first client device, wherein said first response comprises a completed version of at least one of the plurality of completed response template templates, the completed version of the at least one of the plurality of response templates linking one or more of said plurality of parts of said structured entity, ~~the completed response template being selected from among the plurality of response templates by wherein~~ a user providing the first response decides which of the

plurality of response templates to use in the first response and how many of the plurality of response templates to use in the first response.

22. (Currently Amended) The method of claim 21, further comprising the step of:

d) providing a second response to the aggregating device from a second client device, wherein said second response comprises a completed version of at least one of the plurality of completed response template templates linking [[a]] one or more of said plurality of parts of said structured entity.

23. (Currently Amended) The method of claim 22, further comprising the step of:

e) requesting for an aggregated result of said responses first response and said second response from said first client device and said second client devices device.

24. (Currently Amended) The method of claim 23, further comprising the step of:

f) receiving said aggregated result.

25. (Currently Amended) The method of claim 22, further comprising the step of:

f) receiving said first response of ~~said first client device~~ by said second client device.

26. (Original) The method of claim 21, wherein said structured entity comprises a sequential multi-step process.

27. (Original) The method of claim 21, wherein said structured entity comprises a literary work or a portion of a literary work.

28. (Original) The method of claim 27, wherein said literary work is a poem.

29. (Original) The method of claim 21, wherein said structured entity comprises a computer program.

30. (Original) The method of claim 21, wherein said structured entity comprises a musical composition.

31. (Original) The method of claim 21, wherein said structured entity comprises a biological organism.

32. (Original) The method of claim 21, wherein said structured entity comprises a computer data structure.

33. (Original) The method of claim 21, wherein said structured entity comprises an architectural structure.

34. (Original) The method of claim 21, wherein said structured entity comprises a chemical process.

35. (Currently Amended) A non-transitory computer-readable medium having stored thereon a plurality of instructions, the plurality of instructions including instructions which, when executed by a processor, cause the processor to perform the steps comprising of:

- a) forwarding a query pertaining to a structured entity having a plurality of parts;
- b) forwarding a plurality of response templates for answering the query; and
- c) receiving a first response from a first client device that addresses all of the plurality of parts of the structured entity, wherein said first response comprises a completed version of at least one of the plurality of completed response template templates, the completed version of the at least one of the plurality of response templates linking one or more of said plurality of parts of said structured entity, ~~the completed response template being selected from among the plurality of response templates by wherein~~ a user of the first client device decides which of the plurality of response templates to use in the first response and how many of the plurality of

response templates to use in the first response.

36. (Currently Amended) The non-transitory computer-readable medium of claim 35, further comprising the step of:

d) receiving a second response from a second client device, wherein said second response comprises a completed version of at least one of the plurality of completed response template templates linking a plurality of parts of said structured entity.

37. (Currently Amended) The non-transitory computer-readable medium of claim 36, further comprising the step of:

e) aggregating said ~~responses from said first and second client devices~~ first response and said second response to produce an aggregated result.

38. (Currently Amended) The non-transitory computer-readable medium of claim 37, further comprising the step of:

f) forwarding said aggregated result to said first client device or said second client device.

39. (Currently Amended) The non-transitory computer-readable medium of claim 36, further comprising the step of:

e) forwarding said first response ~~of said first client device~~ to said second client device.

40. (Previously Presented) The non-transitory computer-readable medium of claim 35, wherein said structured entity comprises a sequential multi-step process.

41. (Previously Presented) The non-transitory computer-readable medium of claim 35, wherein said structured entity comprises a literary work or a portion of a literary work.

42. (Previously Presented) The non-transitory computer-readable medium of claim 41, wherein said literary work is a poem.
43. (Previously Presented) The non-transitory computer-readable medium of claim 35, wherein said structured entity comprises a computer program.
44. (Previously Presented) The non-transitory computer-readable medium of claim 35, wherein said structured entity comprises a musical composition.
45. (Previously Presented) The non-transitory computer-readable medium of claim 35, wherein said structured entity comprises a biological organism.
46. (Previously Presented) The non-transitory computer-readable medium of claim 35, wherein said structured entity comprises a computer data structure.
47. (Previously Presented) The non-transitory computer-readable medium of claim 35, wherein said structured entity comprises an architectural structure.
48. (Previously Presented) The non-transitory computer-readable medium of claim 35, wherein said structured entity comprises a chemical process.
49. (Currently Amended) The non-transitory computer-readable medium of claim 35, wherein said first response contains an input entered by using said first client device.
50. (Currently Amended) The non-transitory computer-readable medium of claim 49, wherein said input comprises filling in said at least one of the plurality of response template templates.
51. (Currently Amended) The non-transitory computer-readable medium of claim 49, wherein said input comprises linking said at least one of the plurality of response

template templates to at least one of said plurality of parts part of said structured entity.

52. – 53. (Cancelled)

54. (Currently Amended) The non-transitory computer-readable medium of claim [[35]] 49, wherein said input comprises at least one tag.

55. (Currently Amended) A non-transitory computer-readable medium having stored thereon a plurality of instructions, the plurality of instructions including instructions which, when executed by a processor, cause the processor to perform the steps comprising of:

- a) receiving a query pertaining to a structured entity having a plurality of parts;
- b) receiving a plurality of response templates for answering the query; and
- c) providing a first response that addresses all of the plurality of parts of the structured entity to an aggregating device from a first client device, wherein said first response comprises a completed version of at least one of the plurality of completed response template templates, the completed version of the at least one of the plurality of response templates linking one or more of said plurality of parts of said structured entity, ~~the completed response template being selected from among the plurality of response templates by~~ wherein a user providing the first response decides which of the plurality of response templates to use in the first response and how many of the plurality of response templates to use in the first response.

56. (Currently Amended) The non-transitory computer-readable medium of claim 55, further comprising the step of:

- d) providing a second response to the aggregating device from a second client device, wherein said second response comprises a completed version of at least one of the plurality of completed response template templates linking [[a]] one or more of said plurality of parts of said structured entity.

57. (Currently Amended) The non-transitory computer-readable medium of claim 56, further comprising ~~the step of~~:

e) requesting for an aggregated result of said responses first response and said second response from said first client device and said second client devices device.

58. (Currently Amended) The non-transitory computer-readable medium of claim 57, further comprising ~~the step of~~:

f) receiving said aggregated result.

59. (Currently Amended) The non-transitory computer-readable medium of claim 56, further comprising ~~the step of~~:

f) receiving said first response ~~of said first client device~~ by said second client device.

60. (Previously Presented) The non-transitory computer-readable medium of claim 55, wherein said structured entity comprises a sequential multi-step process.

61. (Previously Presented) The non-transitory computer-readable medium of claim 55, wherein said structured entity comprises a literary work or a portion of a literary work.

62. (Previously Presented) The non-transitory computer-readable medium of claim 61, wherein said literary work is a poem.

63. (Previously Presented) The non-transitory computer-readable medium of claim 55, wherein said structured entity comprises a computer program.

64. (Previously Presented) The non-transitory computer-readable medium of claim 55, wherein said structured entity comprises a musical composition.

65. (Previously Presented) The non-transitory computer-readable medium of claim 55, wherein said structured entity comprises a biological organism.

66. (Previously Presented) The non-transitory computer-readable medium of claim 55, wherein said structured entity comprises a computer data structure.

67. (Previously Presented) The non-transitory computer-readable medium of claim 55, wherein said structured entity comprises an architectural structure.

68. (Previously Presented) The non-transitory computer-readable medium of claim 55, wherein said structured entity comprises a chemical process.

69. (Currently Amended) An apparatus for providing feedback, said apparatus comprising:

means for forwarding a query pertaining to a structured entity having a plurality of parts and for forwarding a plurality of response templates for answering the query; and

means for receiving a first response from a first client device that addresses all of the plurality of parts of the structured entity, wherein said first response comprises a completed version of at least one of the plurality of completed response template templates, the completed version of the at least one of the plurality of response templates linking one or more of said plurality of parts of said structured entity, the completed response template being selected from among the plurality of response templates by wherein a user of the first client device decides which of the plurality of response templates to use in the first response and how many of the plurality of response templates to use in the first response.

70. (Currently Amended) The apparatus of claim 69, wherein said means for receiving further receives a second response from a second client device, wherein said second response comprises a completed version of at least one of the plurality of completed response template templates linking a plurality of parts of said structured

entity.

71. (Currently Amended) The apparatus of claim 70, further comprising:  
means for aggregating said ~~responses from said first and second client devices~~  
first response and said second response to produce an aggregated result.

72. (Currently Amended) The apparatus of claim 71, wherein said means for  
forwarding ~~means~~ further forwards said aggregated result to said first client device or  
said second client device.

73. (Currently Amended) The apparatus of claim 70, wherein said means for  
forwarding ~~means~~ further forwards said first response ~~of said first client device~~ to said  
second client device.

74. (Currently Amended) An apparatus for providing feedback, said apparatus  
comprising:

means for receiving a query pertaining to a structured entity having a plurality of  
parts and for receiving a plurality of response templates for answering the query; and

means for providing a first response that addresses all of the plurality of parts of  
the structured entity to an aggregating device from a first client device, wherein said first  
response comprises a completed version of at least one of the plurality of completed  
response template templates, the completed version of the at least one of the plurality  
of response templates linking one or more of said plurality of parts of said structured  
entity, ~~the completed response template being selected from among the plurality of~~  
~~response templates by wherein~~ a user providing the first response decides which of the  
plurality of response templates to use in the first response and how many of the plurality  
of response templates to use in the first response.

75. (Currently Amended) The apparatus of claim 74, wherein said means for  
providing further provides a second response to the aggregating device from a second

client device, wherein said second response comprises a completed version of at least one of the plurality of completed response template templates linking a plurality of parts of said structured entity.

76. (Currently Amended) The apparatus of claim 75, further comprising:

means for requesting for an aggregated result of said ~~responses from said first and second client devices~~ first response and said second response.

77. (Currently Amended) The apparatus of claim 76, wherein said means for receiving ~~means~~ further receives said aggregated result.

78. (Currently Amended) The apparatus of claim 75, wherein said means for receiving ~~means~~ further receives said first response ~~of said first client device~~ by said second client device.

79. (Currently Amended) A system for providing feedback, said system comprising:  
a first client device; and

an aggregating device for forwarding a query pertaining to a structured entity having a plurality of parts and a plurality of response templates for answering the query to said first client device, where said aggregating device receives a first response that addresses all of the plurality of parts of the structured entity from said first client device, wherein said first response comprises a completed version of at least one of the plurality of completed response template templates, the completed version of the at least one of the plurality of response templates linking one or more of said plurality of parts of said structured entity, ~~the completed response template being selected from among the plurality of response templates by~~ wherein a user of the first client device decides which of the plurality of response templates to use in the first response and how many of the plurality of response templates to use in the first response.
